

HIMANSHU

Product · Strategy · Data · AI — Built for Founder's Office & Early-Stage Teams

☎ +91-8851958484 ✉ himanshuworkin01@gmail.com [in linkedin.com/in/himanshu](https://www.linkedin.com/in/himanshu) Portfolio.vercel.app/
Delhi, India

Summary

AI & Data Science undergraduate (CGPA **8.8/10**) who operates at the intersection of product, data, and strategy — and ships from there. Direct C-suite experience in a fast-paced AI startup, 2 live products built from market gap to launch, and a consistent track record of leading cross-functional teams in high-stakes national competitions. Comfortable owning problems end-to-end: from user discovery and PRD authoring to data pipeline design and go-to-market execution. Built for roles where the boundary between product, strategy, and analysis doesn't exist.

Skills

Product & Strategy: Product Discovery, PRD & User Story Writing, Roadmap Prioritisation, Backlog Grooming, GTM Planning, Competitive Analysis, Market Sizing, OKRs, Value Proposition Design, Agile/Scrum, Sprint Planning

Data & Analytics: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL, EDA, Statistical Analysis, Feature Engineering, KPI Design, Trend & Pattern Analysis, Power BI, Tableau, Google Analytics, IBM Watson Studio

AI & Engineering: Machine Learning, LSTM, NLP, Generative AI, LLMs, Agentic AI Systems, OR-Tools, Blockchain (Smart Contracts, Polygon), AWS, System Design, DSA

Research & Validation: User Interviews, Usability Testing, Stakeholder Discovery, Feedback Loop Design, Scientific Paper Implementation, SDG-aligned Policy Research

Tools: Figma, Jira, Notion, Git/GitHub, Jupyter Notebook

Work Experience

Prodigal AI

Jul 2025 – Aug 2025

Strategy & Product Intern | Reporting directly to COO

Remote

- Embedded in the COO's office across 2 concurrent AI products — ran end-to-end stakeholder discovery, synthesised market signals into structured PRDs and feature specs, and reduced sprint ambiguity by an estimated **30%**, accelerating team kick-off cycles.
- Identified a critical KPI-reporting bottleneck in analyst workflows; scoped and implemented a **Generative AI solution (Gemini 2.5 Flash)** that automated end-to-end KPI extraction — eliminating a fully manual, multi-hour reporting cycle with zero new UI surface area.
- Orchestrated Agile sprint cycles for a **4-person cross-functional team** — led backlog grooming, sprint planning, and stakeholder demos from concept through live product launch, iterating on direct user feedback each cycle.
- Authored go-to-market documentation and product launch materials for 2 AI products; awarded a formal **Letter of Recommendation** by the COO for cross-functional impact and adaptability in a fast-paced startup environment.

IBM SkillsBuild × CSRBOX

Jun 2024 – Jul 2024

Data Analytics Intern | 6-Week Summer Programme

Remote

- Led a team of 5 to analyse a **12-year dataset on crimes against women** (2001–2013) across Indian states — performed end-to-end data cleaning, feature engineering, and built heatmaps and trend visualisations in Python to surface regional hotspots and year-on-year pattern shifts.
- Defined the insight prioritisation framework — identified which data cuts answered the highest-impact policy questions first; applied a product-thinking lens: decision-maker's question first, analysis second. Delivered **SDG 16-aligned policy recommendations** from unstructured social data.
- Designed and shipped an Analytics Dashboard that consolidated fragmented KPI data into a single visual interface — eliminated manual reporting effort and improved decision-making speed for non-technical stakeholders.
- Completed **29.8 hours** of IBM SkillsBuild training across Data Analytics, Project Management Fundamentals, AI Agent Architecture, LLMs, and Generative AI.

Live Products & Project Work

NeeLedger — Blue Carbon Credit Traceability Platform | *Blockchain, System Design, AI, GTM*

Aug 2025 – Mar 2026

- Identified a structural trust gap in India's carbon markets: no verified system existed to track blue carbon credits from issuance through ownership transfer to retirement — enabling double-counting and blocking compliance market participation.
- Designed the end-to-end system architecture for a blockchain-based traceability platform — Phase 1 covers ownership, transfer, and sale tracking; Phase 2 adds MRV document linkage (PDDs and verification reports) to support both compliance and voluntary carbon markets. Achieved **100% credit traceability** across the full lifecycle. [Live](#)
- Applied system design principles to architect a multi-layer data pipeline — on-chain audit trail via Polygon smart contracts, off-chain document storage, and a clean non-technical user interface abstracting all blockchain complexity from end users.
- Led a cross-functional team from zero to live product — owned roadmap prioritisation, scoped technical and compliance requirements, and validated usability with real users ahead of each release cycle; reached **National Finalist** standing across multiple competitions.

- VoltIQ** — AI Energy Optimisation Platform | *LSTM, Predictive Analytics, OR-Tools, Python*

Dec 2025 – Mar 2026
- Sized an underserved segment of **3Cr+ Indian smart-meter households** overpaying **23% monthly** with zero intelligent optimisation tooling available — owned the full proposition design from market gap to live product. [Live](#)
 - Built and deployed the ML pipeline end-to-end — LSTM neural networks for consumption pattern modelling, OR-Tools for real-time optimisation, and a consumer-facing dashboard translating complex outputs into instant, actionable savings recommendations.
 - Defined KPIs (monthly saving % and adoption rate) before engineering began — ensured every sprint moved a measurable outcome, not just a feature; validated adoption journey through real user interviews at each stage.

- Probazar** — Blockchain Property Registry | *Smart Contracts, Data Integrity, Polygon*

2025
- Scoped a product proposition to eliminate fraud in India’s manual, paper-based property registration process — led design for a 4-person team, making blockchain verification intuitive for non-technical users; delivered a tamper-proof, cryptographically auditable registry.

Achievements & Recognition

- National Competition Track Record — Consistent Team Lead & Finalist**

2024 – 2026
- AI, Blockchain, B2B SaaS & Product Strategy Competitions*
India
- Certificate of Appreciation** — EY Techathon 6.0; ranked **Top 5,000 out of 2,00,000+** registrations nationwide.
 - 1st Runner-Up** — Paranox 2.0; **Winner (1st Runner-Up)** — Hackstreet 4.0 (National); **National Finalist** — Riverathon 1.0 (World Bank-affiliated).
 - Finalist** — India Innovates 2026 (MCD) & Bharat Innovates 2026 (Ministry of Education); Top 12 — CodeZen 2.0; Top 50 — Graphethon 3.0.
 - Served as **Team Lead** across every competing squad — directed 4–6 person cross-functional teams through discovery, build, and demo under fast-paced, time-constrained conditions.

Education

- Guru Gobind Singh Indraprastha University (GGSIPU)**

Sep 2023 – Aug 2027
- B.Tech, Artificial Intelligence & Data Science | CGPA: 8.8/10 (up to 5th Semester)*
Delhi, India
- Relevant coursework: Machine Learning, Neural Networks, NLP, Blockchain, Cloud Computing, Statistics & Probability, Operations Research, HCI, IoT — applied directly across live product builds, data pipelines, and system design work.
- Good Samaritan School, Jasola (CBSE)**

2021 – 2023
- Senior Secondary (PCM + Computer Science) — 90.1% | Secondary — 94.6%*
Delhi, India

Campus Leadership & Extracurricular

- Abhedya EDC — Cybersecurity Club, GGSIPU**

Feb 2026 – Present
- Team Lead*
Delhi, India
- Spearheaded a cybersecurity seminar for **50+ attendees** — managed end-to-end speaker coordination, logistics, and attendee flow for zero-disruption execution.
 - Designed and ran a structured interview process to onboard new club members — evaluated candidates on technical aptitude and communication, building a high-quality team pipeline.
- ARHAM — The Nature’s Club, GGSIPU EDC**

Feb 2025 – Sep 2025
- Event Management Specialist*
Delhi, India
- Independently delivered **4+ events** across 8 months — owned planning, stakeholder coordination, and on-ground execution within defined timelines, consistently on schedule.
- GameDev Guild — Student Club, GGSIPU**

Oct 2024 – Nov 2024
- Sponsorship Coordinator*
Delhi, India
- Drove outbound outreach to industry professionals to secure event sponsorships — prepared professional pitch decks and managed external stakeholder relationships under tight deadlines.

Certifications

IBM SkillsBuild (2025): AI Agent Architect Learning Plan | Introduction to Large Language Models | The Rise of Multiagent Systems | Crafting Precision Prompts with Generative AI

IBM SkillsBuild (2024): Project Management Fundamentals | Data Analytics — CSRBOX Internship Plan | Make an Impact with Data Analytics | Overview of Data Tools & Languages | Clean, Refine & Visualise Data with IBM Watson Studio | Introduction to Data Concepts

Google: Google Analytics for Beginners | Google Analytics Academy
